I contacted Ms. [redacted] and observed the kitten to be about 6 weeks old. There are 3 kittens and a mother tabby cat that is definitely feral, living outside her patio door. I asked her if she wanted a trap set and the kitten removed and she said no. She said that if it is guaranteed that the kitten will be adopted she will go with the trap but since there is no guarantee she chose not to have the trap set. I told her an officer would call her at the end of quarantine to make sure the kitten is alive alert and healthy. I also referred them to the feral cat coalition for population control in the complex. Gf

Call on 6-18-06 to do quarantine check on the kitten. Gf
